

# New AutoCheck® Score

## New Vehicle History “Score” can Help You Sell More Used Cars

### DEALERSHIP AREA

Used Car Sales

### ISSUES

Comprehensive vehicle information

Consumer confidence in purchase

### Get additional insight with the new AutoCheck Score<sup>SM</sup>

The new AutoCheck Score consolidates AutoCheck data into an easy-to-understand “score” that helps you better interpret and explain vehicle history events to your customers. It includes the AutoCheck Score Range which allows you to compare vehicles of similar age and class when appraising used vehicles. Each AutoCheck Score report has the information you need to build customer confidence in the value of the purchase:

- Comes with each full AutoCheck report
- Includes calculated number of owners
- Provided at no additional charge

Comprehensive summary of critical data including year, make, model, vehicle age and calculated number of owners

The exclusive AutoCheck Score rating provides you with a range of scores so you can compare vehicles of similar age and class

Easy to read summaries of all key information including a Title Problem, Odometer and Vehicle Use and Even checks

### AutoCheck Express

AutoCheck Express is the most comprehensive vehicle history report service in the automotive industry. AutoCheck Express delivers the AutoCheck vehicle history report in a unique format that allows you to cost-effectively pull them for every pre-owned car in the dealership. AutoCheck Express utilizes the power of DealerSuite.com, with complete e-mail messaging, data storage and retrieval system. AutoCheck Express’s polling feature allows you to automatically pull the Vehicle Identification Number (VIN) from your Dealer Management System (DMS), and produces your AutoCheck Score report. All reports are stored and made available online whenever you need them.

The model for the AutoCheck Score was developed by a team of modeling and decision analytics experts from Experian, a global information solutions company and a recognized leader in the development of broad-based and customized scoring models.
